Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 7, 11, 14, 15, 16, 17, and 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. With regard to the aforementioned claims, the claimed subject matter consists solely of mathematical manipulations and equations that produce no tangible results.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 7, 11, 16, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "almost" in claims 1, 7, 11, 16, and 20 is a relative term which renders the claim indefinite. The term "almost" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. More specifically, all of the aforementioned claims refer to an "almost Montgomery inverse".

4. Claims 2-6, 8-10, 17-19, and 12-13 are rejected under 35 U.S.C. 112, second paragraph, as being dependant on a rejected indefinite base claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Burton S. Kaliski Jr., Cetin Kaya Koc, "Analyzing and Comparing Montgomery Multiplication Algorithms," IEEE Micro , vol. 16, issue 3, pp.26-33 (June 1996). The aforementioned publication by Kaliski and Koc discloses in the second to last paragraph of the first column on page 27 that a typical implementation of a Montgomery Multiplication is to take a large number (message) and break it into words for which a Montgomery radix may be applied for the purposes of transforming the words based upon Montgomery multiplication. This meets the exact limitations set forth under claim 21.
